American Precision Prototyping Hires Plastic Production Specialist

-Leading Provider Expands Services to Offer
Mid to High Volume Plastic Production Solutions

Tulsa, Oklahoma, June 8, 2008 – American Precision Prototyping, LLC. (APP), an industry-leading service bureau that provides fast, high-quality Rapid Prototype and Rapid Manufactured parts announced today the addition of plastic production expert David Collier to the APP team.

APP has been providing rapid prototyping and rapid manufacturing services for years with great success. Now, in the spirit of customer service, APP is looking to give their customers another avenue for their production needs by offering mid to high volume injection molding services and a highly qualified plastic production expert to lead that endeavor.

Mr. Collier spent numerous years with a leading production company and brings to APP more than 12 years of experience in the product development industry. With a degree in Applied Science, David has the analytical thought process and knowledge to guide customers through the process of taking their proven designs from prototyping to full production. APP customers will benefit not only from his knowledge from hands on experience but also from his years spent managing projects.

David's knowledge of injection molding and other plastic production methods combined with his excellent repertoire with customers makes him the perfect addition to the APP team and a true benefit to all our customers interested in plastic production solutions, stated Jason Dickman, President of APP. The plastic production process can be very intimidating to the novice user and requires a level-headed, calm leader to address issues as they arise, make timely and knowledgeable recommendations and to anticipate issues and provide solutions that

will benefit the customer and not result in a loss of time and money+; continued Dickman.

%am looking forward to working with the hard working, dedicated team at APP. I have spent many years in this industry and I know how important it is to always be in step with the customer and to understand the immediate and future needs of the customer and their project+; stated Collier. I look forward to working closely with the APP customers to assist them in choosing the best production method for their project and having successful projects each time+; concluded Collier.
