

American Precision Prototyping Releases Redesigned Online Quote System

-Leading Tulsa, OK, Preferred Service Provider Improves Customer Interface

Tulsa, Oklahoma, June 8, 2008 – American Precision Prototyping, LLC (APP), a leading provider of rapid prototyping and direct digital manufacturing solutions, announced today they have redesigned and released their online quote system for both instant and manual quoting.

APP is one of many service providers utilizing instant online quoting. Our customers appreciate the flexibility and convenience the instant online quote service gives them, stated Jason Dickman, President of APP. With the fast paced nature of this industry, an online quote system allows customers the luxury of quoting on their schedule rather than during normal business hours. Instant online quoting for online part purchasing has become as common as online quotes for car insurance, continued Dickman.

The redesigned online quote system has many improvements from the previous version including drag and drop file upload, larger and faster file upload, file upload of non-stl files, increased contact information, access to material and shipping information throughout the quoting process, and an improved manual quoting option all contained within a sleek new look which matches the new look of the APP website.

The screenshot displays the 'Instant Online Quotes' interface. At the top, there are navigation tabs: 'New Quote', 'Existing Quotes', 'Track Orders', 'View Cart', and 'Profile'. The main heading is 'Instant Quote 57813' with a sub-heading 'Refer to your quote for Stereolithography'. A prominent box shows 'Your Quote: \$878.00'. Below this, a section titled 'Parts and Quantity' contains a table with columns for 'File Name', 'Qty', and 'Size'. The table lists three items: 's30011201.stl' (Qty: 1, Size: 5.883" x 15.706" x 1.087" Volume= 9.698 in³), 'guide-2.stl' (Qty: 1, Size: 2.871" x 1.947" x 0.981" Volume= 1.003 in³), and 'noore-dot-sample.stl' (Qty: 1, Size: 4.699" x 4.887" x 2.750" Volume= 7.551 in³). To the right of the table is an 'UPDATE QUOTE' button. Below the table are sections for 'Material Options' (Material: Accura 25) and 'Finish Options' (Finish: Standard). A 'Special Instructions' section is also present. On the right side of the interface, there is a 'Your Account Manager' section with a photo of Georgianne Gilliam and her contact information: 'georgianne.gilliam@aproto.com', '918-266-1004 ext. 274', and 'Direct: 918-735-4381'. Below this is a 'Service Information' section for 'Stereolithography' with a list of materials (Accura 25, Accura 26, Accura 60, Accura Bluestone, Accura Xtreme) and finishes (Remove Support, Standard, Polish (for 80 only), Dye (For 60 only), Multi-Pass, Powder, Color Print, Color Dye, Chrome Plated, Nickel Plated).

We listened to the comments from our customers about their current quoting issues and the things they wanted to see when quoting and we redesigned our online system to accommodate those wants and needs, stated Dickman. Online quoting should be fast, easy to use and informative especially for those users new to the rapid prototyping industry. We used those basic ideas when redesigning and we now have an interactive system that is faster with more options for our experienced customers and more

information during the quoting process for those customers new to the industry+, continued Dickman.

The drag and drop file upload feature allows customers to upload many files simultaneously, upload files of any type and accommodates those files that were at one time too large for online upload. The new system also gives customers the ability to view service sheets about the processes available to them while quoting to determine the best process for their project. Material data sheets, explanation of lead times and shipping options are available as well to assist customers while quoting. APP plans to add new options to the system in subsequent releases that will give customers more options regarding quoting and payment services to enhance the overall online customer experience.

%This is very exciting for us at APP and we hope our customers are as excited as we are. This system was redesigned specifically for them to enhance their overall experience with APP. We are proud of the fact that we have our own equipment in house and our customers know the online quotes they receive are priced competitively and not marked up to offset the cost of outsourcing.+ concluded Dickman.

About American Precision Prototyping, LLC

American Precision Prototyping, LLC, (APP), a privately held services company, is the premier rapid prototyping and manufacturing facility in the Midwest. APP sets itself apart from other rapid prototyping and manufacturing facilities by offering free, instant online quoting 24/7, complete project solutions from design to production utilizing the latest equipment and materials in house, providing unsurpassed customer service, and offering their customers a 100% quality guarantee.

Instant Quotes, Quality Parts.
