

American Precision Prototyping to Give Away 3D Systems V-Flash[®] Desktop Modeler

- Leading Tulsa, Okla., Preferred Service Provider to Give Away 3D Modeler at RAPID Show

Tulsa, Oklahoma, April 17, 2008 - American Precision Prototyping, LLC (APP), a leading provider of rapid prototyping and direct digital manufacturing solutions, is raffling a V-Flash[®] Desktop Modeler at SME's Rapid 2008 Show as a token of thanks to their loyal customers. The V-Flash[®] Desktop Modeler, provided by 3D Systems Inc, will be on display at APP's booth and will be raffled the last day of the show.

The V-Flash[®] offers the resolution and accuracy of high-resolution SLA in an affordable, compact design. At just over 30" tall, the V-Flash[®] fits well into any workstation. The patented Film Transfer Technology uses two to three times less material than conventional systems and houses a self contained, single use material cartridge which also contains material handling wear components thereby reducing maintenance costs. The parts produced with the V-Flash[®] can be used to verify design concept, functional testing, show models and perform fit checks. V-Flash[®] parts have break away supports for easy cleanup and can be sanded, painted, drilled and plated. The V-Flash[®] retails for \$9,900.00 and can be purchased through authorized resellers.

I am always looking for new and innovative products that could better refine the way our customers develop their products. The V-Flash[®] gives our customers a quick check model of their designs before APP can provide higher-end, functional prototypes and production parts. The V-Flash[®] giveaway is a reward to our loyal customers for the business they do with APP. We know our customers have a choice and this is our way of saying thanks for choosing APP⁺, stated Jason L. Dickman, President of APP.

About American Precision Prototyping, LLC

American Precision Prototyping, LLC, (APP), a privately held services company, is the premier rapid prototyping and manufacturing facility in the Midwest. APP sets itself apart from other rapid prototyping and manufacturing facilities by offering free, instant online quoting 24/7, complete project solutions from design to production utilizing the latest equipment and materials in house, providing unsurpassed customer service, and offering their customers a 100% quality guarantee.

Instant Quotes, Quality Parts.
