## American Precision Prototyping Adds Dual Vat iPro™ 9000 SLA® System from 3D Systems

- Leading Tulsa, Okla., 3Dproparts™ Preferred Channel Partner adds advanced Stereolithography capabilities to its fleet -

**Tulsa, Oklahoma, February 8, 2010** – American Precision Prototyping (APP), an industry leading provider of Rapid Prototype and Manufactured parts, announced today it has added a dual vat iPro™ 9000 SLA® System to its fleet of 3D Systems' large-part manufacturing systems.

The iPro™ family of SLA systems offer customers high-quality, durable, end-use parts with exceptional surface finish. This next generation of SLA systems is specifically designed to economically mass produce reliable, proven parts that rival the precision of CNC machined parts. The iPro™ system not only produces ready-to-use large parts but also finely detailed small parts. With a dual vat feature, the iPro™ can produce parts from two different materials simultaneously improving the economics and productivity of the system while ensuring production capacity to accommodate the most time sensitive projects.

"We are very excited to have another iPro™ 9000 SLA® System at APP," said Jason Dickman, APP's president. "Because of the dual vat feature, it's like having two state-of-the-art systems for the price of one. The iPro™ contains all the desired features that make running SLA more efficient, more economical and easier to process. This machine is yet another fine example of excellent engineering from 3D Systems."

"3D Systems' iPro technology truly represents the next generation in additive manufacturing." stated Abe Reichental, CEO and President of 3D Systems Corporation. "Adding another dual vat iPro™ to its growing fleet enables APP to truly differentiate itself as a leading service provider and member of our growing 3Dproparts™ service network. The combination of in-house capacity expansion and access to our entire 3Dproparts™ portfolio of parts solutions empowers APP to offer their customers the best parts solutions available

today. Our long standing relationship with industry pioneers like APP underscores our commitment to innovation and customer success.” Concluded Reichental.

### **About American Precision Prototyping, LLC**

American Precision Prototyping, LLC, (APP), a privately held services company, is the premier rapid prototyping and manufacturing facility in the Midwest. APP sets itself apart from other rapid prototyping and manufacturing facilities by offering free, instant online quoting 24/7, complete project solutions from design to production utilizing the latest equipment and materials in house, providing unsurpassed customer service, and offering their customers a 100% quality guarantee.

*Instant Quotes, Quality Parts.*

More information on the company is available at [www.approto.com](http://www.approto.com).

### **About 3D Systems Corporation**

3D Systems is a leading provider of 3-D Printing, Rapid Prototyping and Manufacturing systems and parts solutions. Its expertly integrated solutions reduce the time and cost of designing products and facilitate direct and indirect manufacturing by creating actual parts directly from digital input. These solutions are used for design communication and prototyping as well as for production of functional end-use parts: Our customers *Create With Confidence*.
